*"In 1981, I started up my new Tonino Lamborghini Style and Accessories company. At the time I was assisting my father in the family group, but I felt the need to do something exclusively of my own, different from the world of engines. I have always been interested in design and accessories. I really liked brands like Gucci and Hermès and I was inspired by them to create an activity with signature branded products. Just as Gucci was inspired by the equestrian world with iconic elements such as a bracket or a bite, I took inspiration from the bearing, the piston, the springs, the suspensions.*

*I've always loved products linked to mechanics and engineering. Thus, it was obvious for me that the first accessory that I realized was a watch. And this is the reason why in each product I create there is a special detail that recalls my family mechanical and automotive heritage. Uncompromising spirit, Italian ingenuity and design - together with the timeless legend of a brand recognized throughout the globe. I hope my clientele understands my personal vision behind all my branded products: to spread the passion and spirit of Italy with unique and distinctive products, inspired by Italian industrial design and the Lamborghini family mechanical heritage".*
